

Work Experience

RUBY ON RAILS AND JAVASCRIPT CONSULTANT

INDEPENDENT | 2017 - Present

≡ Working as a Lead Developer for technology startups: **Rhino Labs** and **Mastermind Manager Inc.**

Rhino: Ruby on Rails backend and React.js/TypeScript client side. Major achievements: built MVP from scratch; added integration with **Yardi Voyager**, developed recurring subscriptions flow with multiple Stripe accounts; built complex automatic reporting system for insurance partners.

Mastermind Manager: Together with my team we've build application from scratch using Ruby on Rails and React/Redux. We also implemented WebRTC video integration with major platforms like Vidyo.io, Twilio, Jitsi Meet. Developed integration with Stripe and Mailchimp/Mandrill, and later replaced Mailchimp email templates builder with own custom solution.

BlackInk:

- Analytics API to track customers behaviour through payment flow (Elixir and PhoenixFramework)
- Readers dashboard with purchases and wallet (Ruby on Rails)
- Lightweight javascript paywall library to be embedded to publishers websites

SENIOR WEB DEVELOPER

Flatstack | April 2016 - June 2017

I was working as a Lead developer on various projects built with Ruby on Rails. At Flatstack I was responsible for sprints planning, mentoring junior and middle employees. I also got familiar with RADIUS authentication and captive portal development.

- ≡ Ruby and Ruby on Rails developing. Mentoring
- ≡ Backend development (high-load, scalability)
- ≡ SQL queries analysis and optimization (PostgreSQL)
- ≡ Client side development with React and Redux
- ≡ Wrote software for **acl.com**, **premiumparking.com** and **securedgenetworks.com**
- ≡ Together with my teammates won internal hackaton by developing bulk upload feature in less than 24 hrs

About me

⚡ **Outside the world of Web Development you will find me as musician, comedian and one of the biggest art-culture lover.**

RUBY/JAVASCRIPT DEVELOPER

Ruby/JavaScript developer | February 2015 - March 2016

I transitioned fast from member to lead developer of a team responsible for one of the largest company projects: interneturok.ru. Solution stack was as follows: Ruby on Rails, Angular, MySQL. My responsibilities included client and server-side development, code review and deployment.

Solution stack: Ruby on Rails, JavaScript, AngularJS, CoffeeScript, MySQL, Nginx, Unicorn, Sidekiq/Redis, Rspec, Jasmine.

While I worked at Racoons Group I got experience with backend API development, implementing real time data update systems (using Websockets).

WEB DEVELOPER

Freelance | August 2014 - February 2015

Developed front end and back end of JavaPractice online service: java programming problems archive with automatic solution verification system. Technologies used: AngularJS, CoffeeScript, Spring Framework, MySQL, and JUnit with Jasmine for testing. During this period I got experience with building client-side applications in Angular; VPS administration and setup experience (Nginx, Tomcat, Java application deployment); experience with building backend APIs using Spring framework
